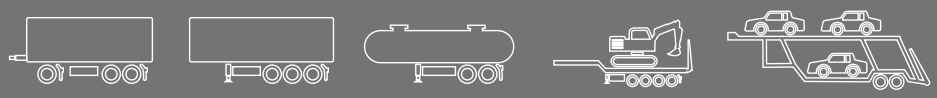
Inflate the profitability of your fleet with VIGIA

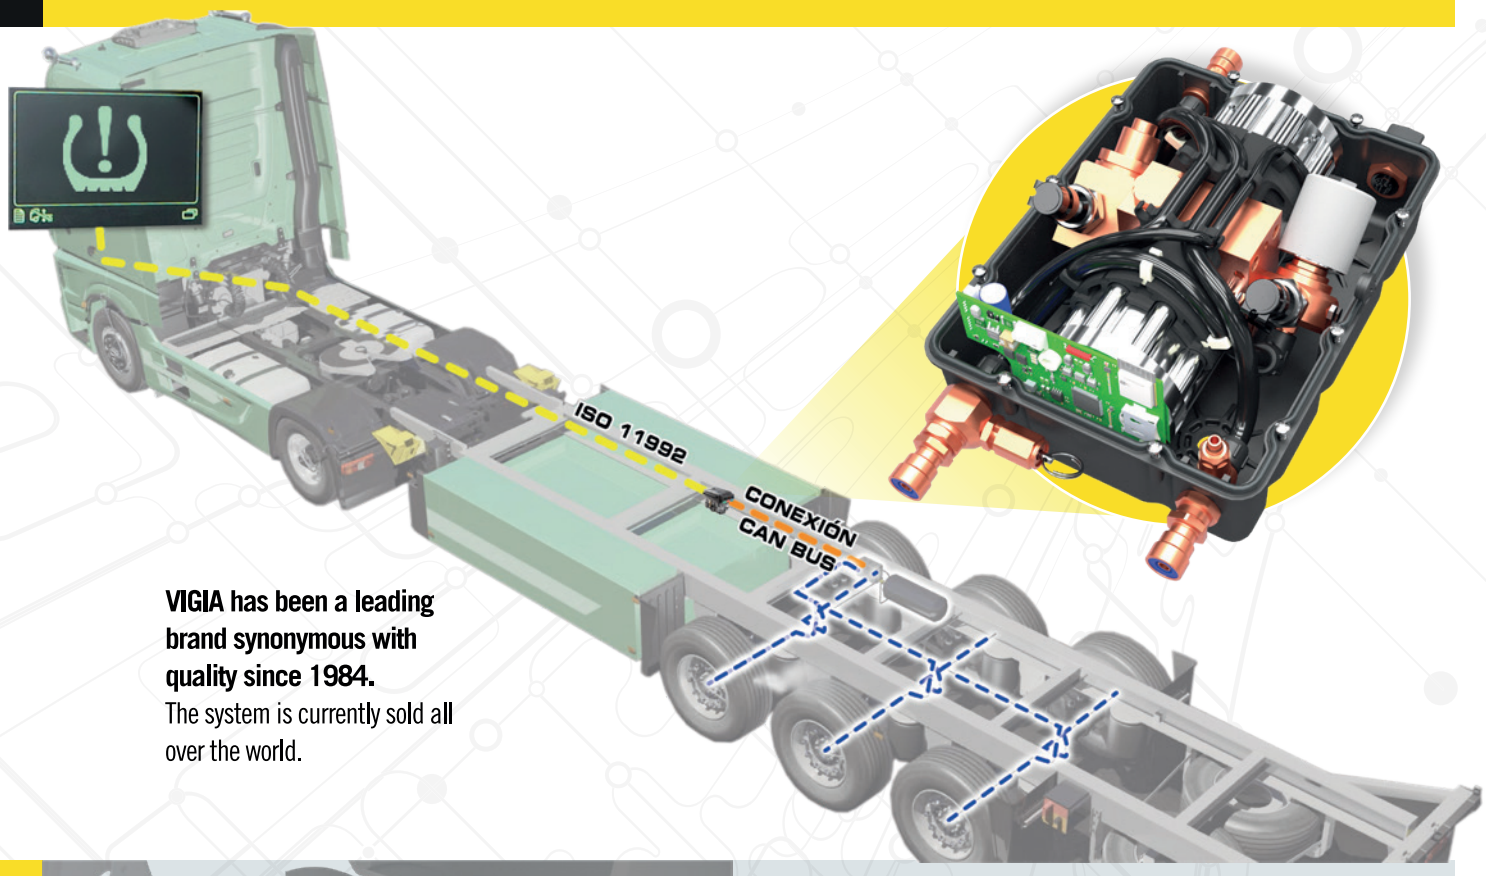


ATIS for trailers and semi-trailers

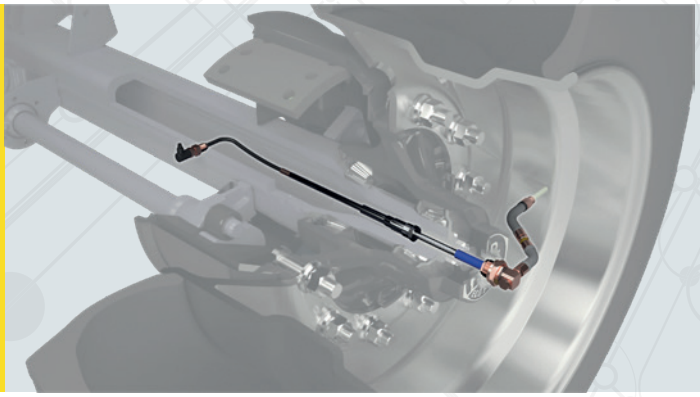
VIGIA NM 257

SAFETY AND EFFICIENCY FOR YOUR TYRES

The VIGIA automatic tyre inflation system constantly and automatically maintains the predetermined pressure recommended by the manufacturer.
In the event of tyre pressure loss, it warns the driver and automatically triggers the inflation process, without the need for human intervention, so the driver can focus on driving with the peace of mind that the tyres are protected, all without having to stop.



VIGIA has been a leading brand synonymous with quality since 1984.
The system is currently sold all over the world.



BENEFITS:

- 100% CONTROL OF YOUR TYRES
- 100% SAFETY
- 100% AUTONOMY

VIGIA®

Advantages of driving with VIGIA calibrated tyres

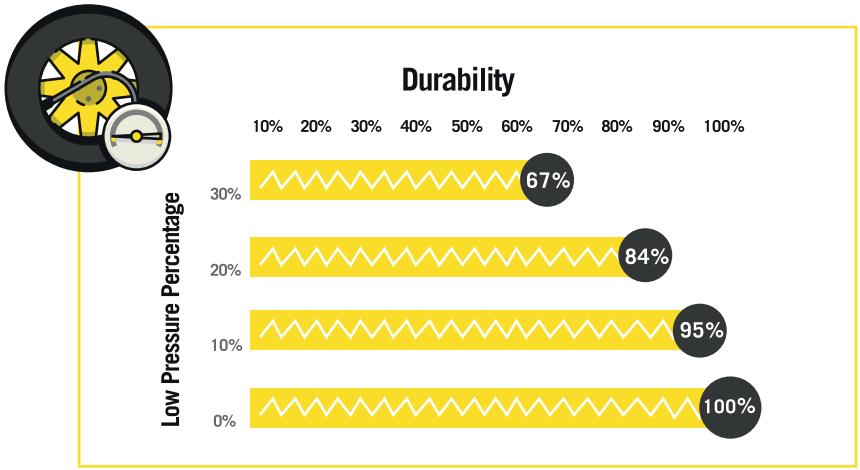
EXTRA DURABILITY
Increases the service life of the tyres by 20%.

EXTRA SAFETY
Correct calibration reduces the risk of accidents due to bursting and provides additional protection for people and goods.

EXTRA RELIABILITY
In the event of a puncture, the system maintains the tyre pressure until you reach the nearest repair site, without the need to stop the vehicle.

EXTRA SAVINGS
Driving with the correct tyre pressure can reduce fuel consumption by up to 5%.

EXTRA PROTECTION
Preserves the tyre casing and optimises retreading.



Tyre durability according to pressure loss percentage.

BENEFITS OF ALL VIGIA MODELS

ONLY ONE WITH SAFETY CONTROL

In the event of extreme tyre pressure loss, a safety valve installed cuts the air supply to the system to ensure that the brakes and suspension function properly.

SILENCER

Installed in the exhaust of the multiplier module, it attenuates air discharge noise when the system is running.

INFLATION GAUGE

Designed to spot which tyre is losing pressure.
